 PR #5633: Fix System.MissingMethodException ...

**Overview**

Tests fail with a *System.MissingMethodException* when using MSTest v3.8.3 with .NET 6 projects.

Problem

- With netstandard2.0 version of the assembly
- When using MSTest v3.8.3 with .NET 6 projects

Changes

- Changed *foreach ((TestProperty key, object? value)*

2. Agent Commits

 **TestExecutionManager.cs** ...

```
+ foreach (KeyValuePair<TestProperty,
+ object?> kvp in tcmProperties)
+ {
+     testContextProperties[kvp.Key.Id] =
+     kvp.Value;
+ }
```

3. Agent Commits

 **DeploymentItemUtility.cs** ...

```
- foreach ((string? key, string? value) in
- deploymentItemsData)
- {
-     AddDeploymentItem(result, new
-     DeploymentItem(key, value));
- }
```

4. Human Reviews

 **DeploymentItemUtility.cs** ...

```
- private readonly ConcurrentBag<Action<object?>, object?>>
+ private readonly ConcurrentBag<Tuple<Action<object?>, object?>>
- foreach ((Action<object?> callBack, object? state)
+ foreach (var callbackInfo in _registeredCallbacks)
- _registeredCallbacks.Add(_ => callBack(), null));
+ _registeredCallbacks.Add(Tuple.Create<Action<object?>, object?>
```

 Revert changes in TestRunCancellationToken.
 Working...

5. Agent Commits

 **TestCancellationToken.cs** ...

```
- using System;
- using System.Collections.Concurrent;
- using System.Threading;
- private readonly ConcurrentBag<Tuple<Action<object?>
- callbackInfo.Item1.Invoke(callbackInfo.Item2);
```

6. Human Comments

 We didn't get a binlog from customer, I think this change is resonable enough to avoid potential issues.

11. PR Closed

10. Human Comments

 It's too fragile to allow netstandard2.0 assembly to be used with MSTest.TestFramework.
